

## Technical analysis on your website

BGRAPH is a **web application** that can upgrade your web site and improve the service provided to your customers.

BGRAPH is a **technical analysis & online financial information system**.

It allows your web-site users to view stock charts, indexes and forex, create high-level quality analysis and manage their portfolio.

BGRAPH system includes **easy to use tools** with highly advanced capabilities, which will upgrade your web site to the next generation.

BGRAPH was designed to be very **dynamic**. Whether, it is as an integral part of your web site available to all users, or with restricted access only to paying customers.

BGRAPH built on simple technology. It's not JAVA and there is no need to download any application on the client side.

BGRAPH also has the option to provide **Buy&Sell Signals** based on automatically technical analysis system which search and analyze stocks, indices and forex.
